What is the Paper Craft Station?

- Multi-Functional System – Cutting, Embossing, and Scoring in one unit.
- Portable – easy to transport all-in-one system.
- Perfect for scrapbooking, card-making, and other paper craft projects.
- Patented paper clamping device – holds embossing templates tightly in place
- Multiple templates for embossing and scoring.
- Accessories provide numerous creative options including box making and envelope making.

Designed by Crafters for Crafters - designed with Stephanie Weightman, Leading crafter.

Helix®

The Paper Craft Station Components include:

Workstation

- **Base** – rigid well built, sturdy construction makes the perfect portable surface to craft on. The recessed area in the base is designed for the crafter to be able to change boards easily to utilize different techniques.
- **Lid** – for extra versatility the lid has many functions including a measuring guide, a tool storage recess and the ability to house tool boards. The lid removes for some applications.
- **Measuring Guide** – this is an essential tool clearly marked for accurate measuring and can also be used to line up card stock and paper.
- **Side clips** – the side clips firmly clamp the lid and base together.
- **Pivot clips** – the pivot clips allow the lid to open and close giving access to the base with minimum interruption.
- **The bed** – the recess into which the crafter can drop the interchangeable boards

Cutting mat – features an accurate measuring guide and large, easy to use cutting surface.

Embossing board – has two widths of line: regular for deep embossing and card scoring and fine for more detail.

Embossing guide – the guide that the crafter lays over the top of the embossing board for quick and easy positioning of their embossing tool. The embossing templates come in a variety of styles including:

- **Basic Shapes**
- **Lines & Waves**
- **Basic Greetings**
- **Everyday Filigree**
- **Christmas Filigree**
- **Box Maker**
- **Envelope Maker**

Easy lift tab – to aid removal and positioning of the interchangeable boards

Aluminum ruler – the shaped aluminum ruler has inch graduations and houses all craft room cutting blades

Rotary trimmer – the craft room comes with an interchangeable cutting system. The rotary trimmer is perfect for when speed is needed. Trimmers can be stored on the aluminum ruler when not in use. There are four styles currently available:

- **Straight trimmer**
- **Wavy trimmer**
- **Perforation trimmer**
- **Arrow trimmer**

Magnets – for added security, there are magnets in the lid and base of the craft room

Double-headed embossing tool – the heads in this tool have been chosen to complement the medium and ultra fine lines on the embossing board. The stylus comes with cushion comfort grips for ease of use.

A Tradition of Quality and Innovation:

Helix USA is part of Helix PLC Group, which was founded in 1887 as The Universal Woodworking Company Ltd. Math, geometry, and measurement accuracy are at the core of Helix's heritage. Our original product range was founded in wood rulers and laboratory measuring devices. In 1894, the Helix brand became widely known for the invention of our Helix Patent Ring Compass from which we take our current company name. Since then, Helix has introduced many of the first products in math, geometry and drafting for the student as well as the professional.

Today in the U.S., Helix is widely known as the leading brand in drafting and school supplies. Millions of students have learned the basics of math and measuring use with Helix products. College students and professionals utilize Helix drafting products everyday for drafting, design and engineering projects. Chances are your school, home or office building was initially conceived and designed with Helix drafting instruments.

Helix reaches well beyond the drafting and traditional school segments. Our wide range of professional and art papers are used by the hobbyist and professional alike. Our complete line of cutting mats, measuring tools, lettering guides and templates are used in art, design and craft projects.

As we grow, we are always aware that you are the most important key to success and we will continue to deliver products that deserve our Helix brand name and your patronage.

37108 Drafting Starter Kit

For over 100 years, compasses and technical drawing sets have been at the heart of our business. Now, Helix has redesigned our drawing and drafting tools using the most up-to-date technology.

Features of our Helix drawing sets include:

- Produced from high quality metal alloy with plastic compound joints for better staying power
- Extension arms provide a level pencil and point for more accurate drawing
- Adjustable “knees” for better accuracy
- Lightweight, yet sturdy

20081 Giant Bow Compass

- Contains:
- 5½” Bow compass
 - Compass lead replacement in storage capsule
 - Storage case

- Contains:
- Replacement spikes in storage capsule
 - Storage case

62704 Divider - 6”

- Contains:
- Replacement spikes in storage capsule
 - Storage case

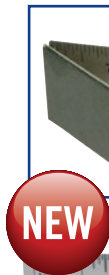

37048 Spare Leads

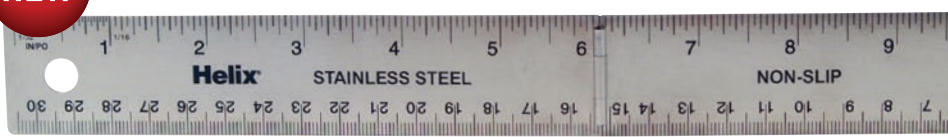

Rulers from Helix rulers undergo quality inspections for precise accuracy and legibility. Most Helix rulers feature inch (also known as imperial) and metric markings in clear and easy to read printing. All plastic rulers can be recycled. Helix was the first company to mass produce rulers starting in 1887.

*All Helix stainless steel rulers are printed using an eco-friendly printing process instead of acid etching.

13013 12" (30cm) Folding Stainless Steel Ruler*

- Folds to fit into any tool box or pencil pouch
- Engineered hinge allows straight, "non-kink" lines
- Cork backing for non-slip grip

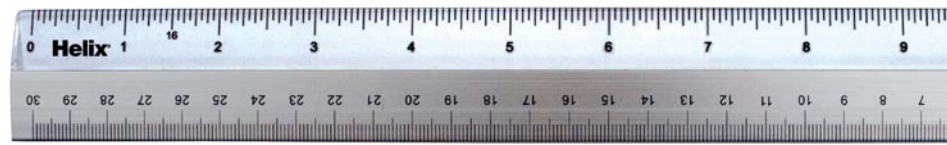

Stainless Steel Ruler*

- 13024 24" (60cm)
- 13018 18" (46cm)
- 13015 15" (38cm)
- 13012 12" (30cm)
- 13006 6" (15cm)

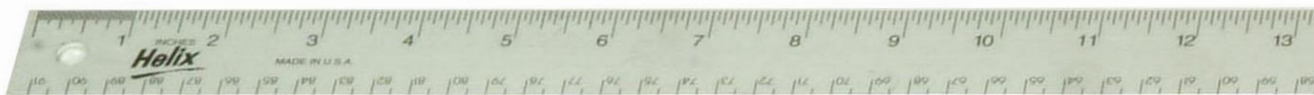

- Cork backing for non-slip grip

5 50

5 25

10 120

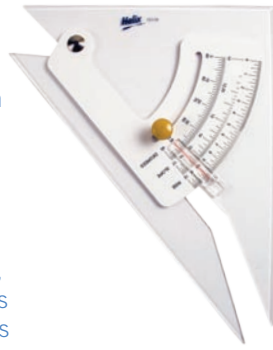

- Great for students
- Beveled blade for drawing
 - Ruler with both inch and metric graduations
 - Hang hole for easy merchandising

Helix offers a variety of precision tools to aid both students and professionals with drafting their ideas and thoughts onto paper.

Although people around the world speak different languages, a universal graphic language has existed since the earliest of times . . . Drafting.

Fun Facts:
Millions of years ago when primitive drafters illustrated on the walls of caves, man used drafting as a visual and descriptive way to share ideas using illustrations and drawings to represent things, ideas or proposed designs which would later turn into actual manufactured products or structures.

The same is true today, although the tools have become quite sophisticated, the language of drafting is the same.

Technical Drawing Set

17891 Large

Includes: 12" ruler, 8-3/8", 30°/60°/90° triangle, 5-3/4" 45°/90° triangle, 6" protractor

17881 Medium

Includes: 8" ruler, 6-3/8" 30°/60°/90° triangle, 4-3/8" 45°/90° triangle, 4-3/4" protractor

Helix®

All Helix protractors are made from clear, recyclable plastic with bold, easy to read markings for greater accuracy.

Fun Facts:

An instrument used to construct and measure plane angles. The simple protractor, an ancient device, looks like a semicircular disk marked with degrees, from 0° to 180°.

The first complex protractor was created for plotting the position of a boat on navigational charts. Called a three-arm protractor or station pointer, it was invented in 1801, by Joseph Huddart, a U.S. naval captain. The center arm is fixed, while the outer two are rotatable, capable of being set at any angle relative to the center one.

12081
6" (15cm) 360° Folding Protractor

- Fits into a pencil case
- Folds out to a full 360°
- Clear, easy to read markings

12091
6" (15cm) 360° Protractor

- Includes beveled edges and finger lift

12071
6" (15cm) 180° Protractor Shatter Resistant

- Beveled edges and finger lift
- Magnified centering point
- Ring Binder holes
- Clear, easy to read markings

36002
Angle & Circle Maker - Asst. Colors

- Measures angles
- Draw angles
- Draw circles

Graduated Flexible Curve
21475 24" (60cm)
21471 12" (30cm)

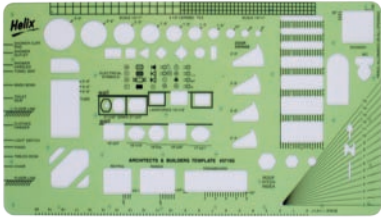

- Graduations in both inch and metric

21561
French Curves - Set of 3

- Tinted clear material

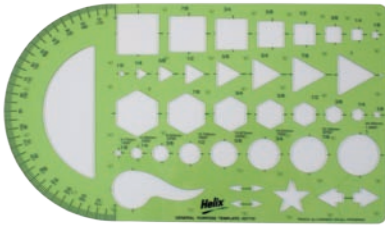

37165 Architects & Builders Template

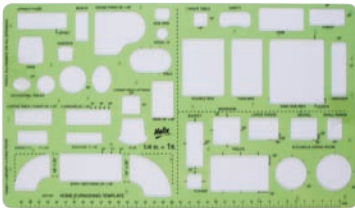

- Incorporates basic symbols used by architects, builders and contractors
- Features title layout scale and elevation WC view
- Scale: 1/4" = 1 foot
- Made from dimensionally stable .03" transparent shatter resistant plastic
- Built-in ink risers eliminate smudging
- Easy to pick up and reposition
- Cut-out identifications and ruler scales printed in easy-to-read black ink
- Designed for use with a 0.5mm lead - all openings have pencil allowance
- Dimensions: 9-1/4" x 5-1/4"

37170 General Purpose Template

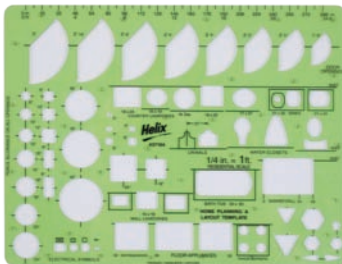

- Equilateral triangles, hexagons, squares and circles
- 3 sets of arrows and a star
- 180° protractor
- Fractional inches with decimal inches and mm equivalents
- Ink risers on reverse side prevent smudging when using inking pen
- Centering lines are printed around cut-outs
- Designed for use with a 0.5mm lead
- Made from dimensionally stable .03" transparent shatter resistant plastic
- Dimensions: 5-1/2" x 9-1/2"

37167 Home Furnishings Template

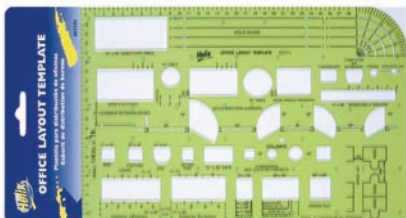

- 39 cutouts for interior design, room planning and home furnishings
- Scale: 1/4" = 1'
- Includes 36" scale
- Made from dimensionally stable .03" transparent shatter resistant plastic
- Built-in ink risers eliminate smudging
- Easy to pick up and reposition
- Cut-out identifications and ruler scales printed in easy-to-read black ink
- Centering lines are printed around cut-outs
- Designed for use with a 0.5mm lead
- Dimensions: 10" x 5-3/4"

37164 Home Planning Layout Kit Template

- For architects, builders and contractors
- Scale: 1/4" = 1 foot
- Made from dimensionally stable .03" transparent shatter resistant plastic
- Built-in ink risers eliminate smudging
- Easy to pick up and reposition
- Cut-out identifications and ruler scales printed in easy-to-read black ink
- Centering lines are printed around cut-outs (where applicable)
- Designed for use with a 0.5mm lead - all openings have pencil allowance
- Dimensions: 7" x 5-3/8"

37171 Office Layout Template

37166 Sketch Master

5 100

- Equilateral triangles, hexagons, squares and circles
- 48 shapes total; 12 each 1/32" increments from 3/32" to 1/2"
- Includes 5" scales in 1/32" and 1/10"
- Fractional inches with decimal inches and mm equivalents
- Ink risers on reverse side prevent smudging when using inking pen
- Centering lines are printed around cut-outs
- Designed for use with a 0.5mm lead
- Made from dimensionally stable .03" transparent shatter resistant plastic
- Dimensions: 3-1/2" x 5-7/8"

37169 Large Circle Template

5 100

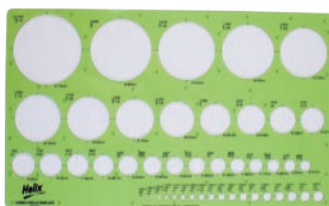

- 10 circles and 4 radii
- Circle sizes: 1 1/2", 1 3/4", 1 7/8", 2", 2 1/4", 2 1/2", 2 3/4", 3", 3 1/4", 3 1/2"
- Radius sizes: 1/2, 5/8, 3/4, 1"
- Fractional inches with decimal inches and mm equivalents
- Ink risers on reverse side prevent smudging when using inking pen
- Centering lines are printed around cut-outs
- Designed for use with a 0.5mm lead
- Made from dimensionally stable .03" green transparent shatter resistant plastic
- Dimensions: 6-3/4" x 13-1/4"

37168 Small Circle Template

5 100

- 39 circles
- Circles in 1/64" increments from 1/16" to 1-3/8".
- Fractional inches with decimal inches and mm equivalents
- Ink risers on reverse side prevent smudging when using inking pen
- Centering lines are printed around cut-outs
- Designed for use with a 0.5mm lead
- Made from dimensionally stable .03" green transparent shatter resistant plastic
- Dimensions: 4" x 7-1/4"

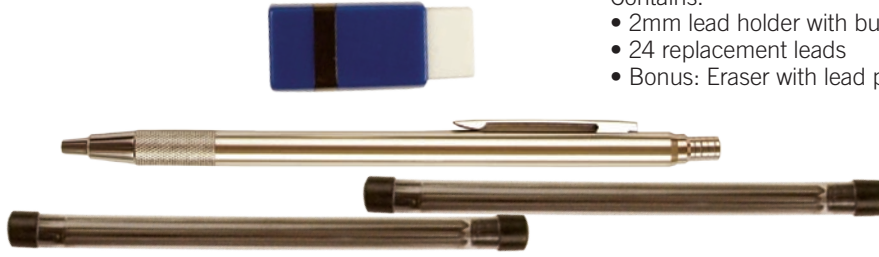

37163 Combo Circle Template

5 100

- 45 circles
- Circles in 1/32" increments from 1/16" to 2 1/4"
- Fractional inches with decimal inches and mm equivalents
- Ink risers on reverse side prevent smudging when using inking pen
- Centering lines are printed around cut-outs
- Designed for use with a 0.5mm lead
- Made from dimensionally stable .03" green transparent shatter resistant plastic
- Dimensions: 6-1/2" x 11"

Rulers from Helix rulers undergo quality inspections for precise accuracy and legibility. Most Helix rulers feature inch (also known as imperial) and metric markings in clear and easy to read printing. All plastic rulers can be recycled. Helix was the first company to mass produce rulers starting in 1887.

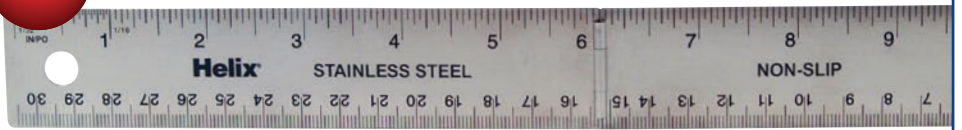

*All Helix stainless steel rulers are printed using an eco-friendly printing process instead of acid etching.

13013 12" (30cm) Folding Stainless Steel Ruler*

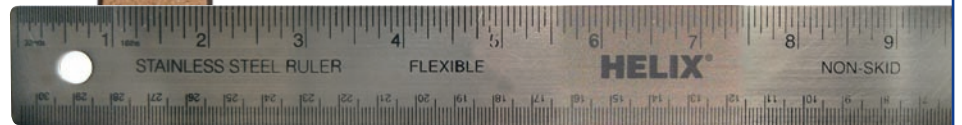

- Folds to fit into any tool box or pencil pouch
- Engineered hinge allows straight, "non-kink" lines
- Cork backing for non-slip grip

Stainless Steel Ruler*

- 13024 24" (60cm)
- 13018 18" (46cm)
- 13015 15" (38cm)
- 13012 12" (30cm)
- 13006 6" (15cm)

- Cork backing for non-slip grip

Acrylic Office Ruler

- 15018 18" (46cm)
- 15015 15" (38cm)
- 15012 12" (30cm)
- 15006 6" (15cm)

- See through clarity

24024 Whiteboard Caddy Ruler w/Eraser

- Detachable eraser
- 2 storage compartments to hold markers or cleaning supplies
- Magnetic strips for easy storage on a magnetic white board

61002 12" (30cm) Magnifying Ruler

- Center line for easy tracking
- Ideal for spreadsheets and analyzing data
- Perfect for proofreading text

61006 2X Magnifying Sheet 8½" x 11"

- Ideal for reading large areas of print
- Scratch resistant lens
- Ideal for Maps Newspapers and Books

32523 3X Magnifying Sheet 3" x 2"

- Fits perfectly into a pocket wallet or purse
- Ideal for checking restaurant bills, menus and labels

61003 Magnifying Cube 8X

- Includes focus ring for perfect clear vision
- Compact and lightweight
- Long lasting, durable protective case
- Ideal for inspecting printed materials, photos or jewelry

61008 Magnifying Glass Bi-Focal 2X/4X 3" Diameter

- Bi-Focal magnification feature
- Scratch resistant lens
- Lightweight for portability

61009 Magnifying Glass 5X Illuminated 3" Diameter

- Comfortable Ergonomic grip
- High quality scratch resistant lens
- Perfect for low light conditions

Helix®

Let Helix's security line hold your valuables:
 Helix cash boxes are made from high quality steel with a scratch resistant finish. Their unique catch mechanism keeps the lid closed even when locked.
 Helix book safes are a practical idea that adds to home security, but is also an ideal treasure box for sentimental keepsakes.

Helix®

Helix offers a variety of precision tools to aid both students and professionals with drafting their ideas and thoughts onto paper.

Although people around the world speak different languages, a universal graphic language has existed since the earliest of times . . . Drafting.

Fun Facts:

Millions of years ago when primitive drafters illustrated on the walls of caves, man used drafting as a visual and descriptive way to share ideas using illustrations and drawings to represent things, ideas or proposed designs which would later turn into actual manufactured products or structures.

The same is true today, although the tools have become quite sophisticated, the language of drafting is the same.

 - Hang hole for easy merchandising

Helix®

All Helix protractors are made from clear, recyclable plastic with bold, easy to read markings for greater accuracy.

Fun Facts:

An instrument used to construct and measure plane angles. The simple protractor, an ancient device, looks like a semicircular disk marked with degrees, from 0° to 180°.

The first complex protractor was created for plotting the position of a boat on navigational charts. Called a three-arm protractor or station pointer, it was invented in 1801, by Joseph Huddart, a U.S. naval captain. The center arm is fixed, while the outer two are rotatable, capable of being set at any angle relative to the center one.
